***Reference letter to company CLARICO d.o.o.
for product Permanon SOLAR 2in1***

Permanon Solar 2in1 was used for cleaning and surface protection of solar panels.

In April 16th 2013 part of our solar panels was cleaned and protected with Solar 2in1. After treatment the surface was totally water-repellent. But the biggest result was seen in winter. From the panels, treated with Solar 2in1, the snow fell off much sooner than from the untreated ones, which leads to the better productivity of panels.

I confirm, that product Permanon Solar 2in1 is the most appropriate choice for cleaning and protection of solar panels, because it increases the productivity of panels, it is easy to use and is effective through the whole year.
